**2. SITUATION:**

**A. SIGNIFICANT EVENTS:**

**A1. 04/30/09, 1645** The Idaho State Laboratory sent Idaho's first probable case of swine flu to the Centers for Disease Control and Prevention for confirmation. The patient is a Kootenai County woman in her 60s who recently traveled to Texas. So far, 38 other lab samples have tested negative, with 15 additional reports under investigation.

**B. STATE PRIORITIES:**

- B1.** Monitor the H1N1 Influenza spread and execute the public health anti-viral repositioning plans.
- B2.** Provide statewide Situational Awareness regarding the ongoing H1N1 Influenza event.
- B3.** Support requests for assistance by coordinating with primary emergency support function agencies identified in the Idaho Emergency Operations Plan. At this time Idaho Department of Health and Welfare is the lead agency for this event.

**C. DESCRIPTION OF IMMINENT HAZARDS:**

H1N1 is a previously unknown virus spread by human to human contact for which there is no existing vaccination, or immunity within humans. This virus has spread from its originating location in Mexico throughout the world. The unique nature of the H1N1 virus creates a potential for this virus to evolve into an influenza strain capable of causing a worldwide pandemic with accompanying loss of life and negative economic impact.

**D. OTHER MAJOR PROBLEMS:**

**E. ESTIMATED DURATION:** Unknown - Reports will continue while H1N1 Influenza is a potential pandemic or a pandemic.
